(57) Abstract :

The present disclosure relates to the field of a computer fitting technology. More particularly, the present disclosure relates to a hard disk storage display device (100). The device includes a hard disk (102) integrated with a display unit (104) to display information about empty space on the hard disk (102), for this, the device can use the raspberry Pi 4 and python programming processor (106). The device (100) further includes a toggle button (108) that can toggle the display unit (104) on and off. An USB cable (112) that can be used to charge the hard disk (102). The device (100) should be able to show text in a wide range of languages. The processor (106) may be communicatively coupled to a monitoring unit for processing the storage information available of the hard disk (102) and transfer the storage information about free space of the hard disk (102).
