(57) Abstract :

Embodiments of the present disclosure relates to a system (100) and method (300) for supporting targeted sharing and early curation of information through a computerized platform that enables users to easily share information with selected groups of individuals, receive feedback, and organize shared information for easy retrieval and reference. The system (102) comprises a processor (202) coupled to a memory (204). The memory (204) stores processor-executable instructions. The processor (202) is configured to create a profile for the user. Next, the processor (202) is configured to connect the created profile of the user to one or more profiles of other users. Thereafter, the processor (202) is configured to receive posts of the information from the user. In the end, the processor (202) is configured to curate the received posts for quick retrieval of the information.
