(57) Abstract :

The present invention relates to a manure collection device (100) to efficiently collect and manage animal waste. The device (100) includes a container (102) configured for accumulation of manure, and a pair of straps (104, 106) attached to the container (102) to securely fasten container (102) to the body of an animal. A string (108) is coupled to both the container (102) and an attachment unit (110), which is detachably coupled to the animal's tail to provide support while collecting manure. The manure collection device (100) provides a practical and convenient solution for manure collection, ensuring cleanliness and comfort for both the animal and the caretaker
