3)MANTRI, Archana

Address of Applicant :Chitkara University, Chandigarh-Patiala National Highway, Village Jhansla, Rajpura, Punjab - 140401, India. Patiala -----

(57) Abstract :

The present invention relates to the field of web development and content management systems. More specifically, the invention relates to a method and system for updating time-sensitive content on a web page in real-time. The system (100) includes a database (102), a timer device (104), a content management device (106), a cloud server (112) and a notification unit (110). The database (102) stores a time-sensitive content. The timer device (104) triggers the update of the content based on a predetermined time. The content management device (106) updates the content in real-time and displays it on a web page. Advantageously the present invention relates to a simple to use and maintain automatic method for updating time-sensitive content and a system with a CMS, which makes it simpler to maintain and update website content.
