(57) Abstract :

The present invention is related to the field of a supply chain management, and more specifically relates to the system (100) and method (300) for preventing the diversion of cement bags by enhancing transparency, data sharing, and real-time tracking across the supply chain. The cloud implemented system (100) includes a brokerage service center (102) connected via a network (104), wherein the brokerage service center (102) is communicatively coupled to the system (100); one or more dealers (106) are communicatively coupled to the brokerage service center (102) to place orders of the cement bags distribution; and a warehouse server (108) for directing the brokerage service center (102), and a distribution center (110) for the cement bags distribution using supply chain management. By integrating the brokerage service center (102) into the cement bag diversion solution enables a more streamlined and efficient process for the one or more dealers (106).
