(57) Abstract :

Disclosed are a cover assembly, a battery and a battery pack. The cover assembly includes a cover body and an insulating member. The insulating member includes a connecting portion and a guide portion. The connecting portion is mounted to the cover body, the guide portion is provided in an annular shape and connected to a side of the connecting portion away from the cover body in a first direction. The guide portion is provided with a cavity and comprises a guide surface away from the cavity. The guide surface is an inclined surface. An orthographic projection of the guide surface in the first direction falls entirely within the connecting portion.
