(57) Abstract :

A lavatory-integrated resting device is comprising a bedframe 101 with a multi-section platform 102 including a head section 102a, middle section 102b, and foot section 102c, integrated with the bedframe 101 to support a user in a resting position, hinge joints 103 are provided between successive sections to enable adjustment of the angular position of each section relative to the adjacent section, a bedpan 104 is integrated with the middle section 102b for convenient user access, a jet bidet 105 is provided with the bedpan 104 for washing, receiving water from an attached tank 106 via an interconnecting tube 107 and pump 108, a flushing unit is installed in the bedpan 104 to direct waste into a removable chamber 110 at the bottom, ensuring cleaning after use, an incinerator unit 111 heats accumulated waste, a speaker 113 mounted on the bedframe 101 provides audible instructions when unhealthy posture is detected.
