(57) Abstract :

A cosmetic kit, comprising a cuboidal base 101 integrated with a plurality of shelves 102, the shelves 102 connected to the base 101 by elongated members 103 that are angularly displaced to deploy the shelves 102 in a vertically stacked configuration, a camera 106 integrated with each shelf 102, a closing member 104 mounted on guiding rails 105 for horizontal deployment, a speaker 107 embedded within the cuboidal base 101, a touch screen enabled display 108 positioned on a lateral side of the top shelf 102, a processing module coupled to each camera 106, the speaker 107 integrated on the cuboidal base 101 generates audible cues to alert the user, and the processing module embedded with artificial intelligence and machine learning protocols pre-trained to detect the location of cosmetic products on the shelves 102.
